Dear Ms. Roth:

Re: Work Plan for Groundwater Seepage Evaluation: *Terminal 91 Tank Farm Site*  
*Agreed Order No. DE 98HW-N108*

This correspondence serves as official approval by the Washington State Department of Ecology (Ecology), for the proposed *Work Plan for Groundwater Seepage Evaluation* (Workplan) that was received by Ecology on July 6, 2004. It is our understanding that monitoring wells and transducers will be installed prior to August 20<sup>th</sup> in order to take advantage of the favorable tides. The Workplan specifies a schedule in Table 3-1 that Ecology is hereby approving and a "Draft Seepage Report" should be received by Ecology no later than November 15, 2004. If you experience any major problems during the field work or modeling that could affect the schedule, please contact either Greg Caron (509) 454-7893 or myself as soon as possible.

If you have any questions or comments, please contact me at the Department of Ecology Northwest Regional Office by phone at (425) 649-7280 or by email at [gtri461@ecy.wa.gov](mailto:gtri461@ecy.wa.gov).

Sincerely,

Galen H. Tritt
